Jet Propulsion Laboratory Edwards Facility, HAER No. CA-163-B
Test Stand A, Control Center (Building 4203/E-4)
Edwards Air Force Base
Boron Vicinity
Kern County
California

Photographs by Brian Grogan, Yosemite
Photographics, Inc. December 1994/January 1995

- CA-163-B-1** West elevations of barrier (Building 4216/E-17) and Monitor Building (4203/E-4). Barrier is built of wood infilled with earth, intended to protect Monitor Building from flying debris should anything at Test Stand "A" explode. Building 4203/E-4 is built of reinforced concrete; equipment on top of it is cooling tower for refrigeration equipment in Test Stand "A" machinery room. Electrical utility poles are typical at the facility, and carry 4,800 volts 3-phase alternating current.
- CA-163-B-2** View looking west southwest at Test Stand "A" complex. Monitor Building 4203/E-4 is hidden behind barrier (4216/E-17).
